Party at the S. P. Hi.

The re-union of students and their friends held last evening at the High school was well attended. The ranks of present-day pupils and resident graduates were augmented by former pupils from the City and other places. A big percentage were in costume and masked, and this gave rise to lots of fun. Mr Henri Pailer, in topper and swallowtail, was master of ceremonies, and performed his duties in a highly efficient manner, for the first time on the stage. Such a good time was experienced, a number expressed the hope another of these delightful affairs would be held in the near future.

Among those invited were:

Mrs Gates
Mrs R E Wood
Mr T J Hardwick
Rev W E and Mrs Sieber
Mr and Mrs O G Wudal
Mr and Mrs John Staub
Mr and Mrs Moyer
Mr and Mrs Bryan
Dr and Mrs Oatway
Mr and Mrs Yeats
Mr and Mrs Malloch

Excitement on Main St.

A good demonstration was given here on Saturday morning of what a husky team of horses can do, hauling a load of bagged grain and having the tongue unhooked from neckyoke, and having no driver. A team belonging to a local farmer which was left standing on north Main St. became frightened and bolted, headed south, the wagon tongue dragging on the ground. Opposite The Sun office the wagon tongue snagged in the road and broke off a 3-foot piece. The team kept traveling joyously along helly hoot when Mr Bjork sprang out, grabbed the high horse's check-rein, and hung on till the horses were brought to a standstill. An obliging neighbor of the owner of the runaway, picked up the bags of grain which had been sprinkled along the roadway.

Gravelling Main St.

Well, well! the Citizens were surprised the other morning when they came awake to find the age-old promise to gravel Main street was about to be fulfilled, a start having been made at the Mayor's gate, and the work to be continued up to Christie's Corner. At the same time Mike got out his tractor and go-devil and began planing off the road in preparation for the gravel. Much credit is due Mr J Christie, the energetic member of the town council, for the way he has, in season and out of season, insisted on this work being done.

The Season's Big Event.

Preparations are about completed for what promises to be the event of the season in Stony Plain—the big masquerade dance at Kelly's Hall tomorrow (Friday) night, Nov. 2. The promoters ask that you please come in costume and mask. If you haven't got a costume, come any way, and we come. A good time is assured you, and there promises to be lots of fun. Prizes will be given the wearer of the best fancy costume, and to the best comic. Lou Chapin's musicians will be there.

HARDWICK'S THE HOUSE OF QUALITY.

Women's Overshoes:

2 snap fasteners, fine wool Jersey cloth top; black or brown; sizes 2 1-2 to 8; sale price, per pair \$2.85.

The People's Responsibility

No apology need be offered to the readers of this column, we feel sure, for again discussing the same subject that formed the topic of last week's comment, namely, the ever mounting toll of deaths and serious injuries attributable to automobile accidents. The most effective way of minimizing as far as possible these tragedies is, it will be admitted, the arousing of public opinion because, unless public opinion is aroused, all the preventive laws in the world will not prove effective.

In conversation with the writer the other day a mother of a family, careful, conscientious, intelligent and of the very best type of Canadian citizenship, one who takes a keen and active interest in all movements for the betterment of the community and province in which she lives, stated that only recently she and her husband had had the narrowest of escapes from a serious and probably fatal car accident. Let us recite the simple circumstances.

Driving at a moderate rate, her husband at the wheel came to a point where the making of a left turn was necessary. He proceeded to make it. At the same moment the driver of a car behind them speeding at forty miles an hour decided to pass ahead. Without slackening speed and without sounding his horn in warning to the car ahead, he shot past, thus violating the rules of the road in at least two respects. He side-swiped the car in which the lady and her husband were driving, smashed a headlight to smithereens, tore off the front bumper, and all but wrecked the car. But, added the lady, we too, were to blame because my husband had neglected to put out his hand indicating his intention to make the left turn. Fortunately no person was hurt.

All simple things,—failure to sound a horn before attempting to pass the car ahead, failure to reduce speed when overtaking and passing the car ahead, failure of the car ahead to indicate its proposed change of direction, and three lives endangered, several children narrowly escaped being orphaned, two families barely saved from leaving sorrow and much suffering. The laws were enough, a policeman right on the spot could not have enforced those laws in time to prevent a tragedy. Two individuals were alone responsible for placing their own lives and that of others in jeopardy. Either one of them could have avoided this near calamity.

It is probable that as these lines are being written other near-accidents of a more or less similar nature are taking place, and possibly serious injuries and even death are the result. Who is to blame? The people themselves. Nobody else. And such accidents will continue and will multiply until people by observing all laws and regulations, and through the exercise of proper caution at all times, put an end to such accidents.

In this article, too, emphasis may well be placed upon the terrible menace of "glaring headlights". They are prohibited by law, yet are to be found upon practically every road and highway every night. Glaring headlights—which blind the driver of any approaching car, making it impossible for him to judge his distance from the approaching car which has blinded him or to see what is ahead of him. And because one car has such lights burning, the other driver refuses to dim his lights, and two high powered cars rush at each other,—sometimes they pass safely, sometimes they do not, and all too frequently even when a head-on crash does not result, one or both cars end up in the ditch, or meet some other adverse fate.

The owner of the "glaring lights" is apparently quite reckless and indifferent to the fact that by blinding the driver of approaching cars he may be inviting his own death, because the blinded driver may smash into him; and when driver No. 2 refuses to dim his lights because the other fellow did not, he is only multiplying his own risks because he is blinding the other fellow. Again, who is to blame for the catastrophes which so frequently follow? Not the law, because the actions of these car drivers is unlawful. Nor can any army of policemen be maintained along every highway to enforce the law. The best that is possible is to make examples of people when they can be caught.

It is people themselves who are to blame, and it is well nigh impossible to identify the culprits because the glaring lights renders the taking of car license number extremely difficult. It is public opinion that must first be aroused and educated to put a stop to these violations. It is not legislators, governments and police forces which alone have responsibility in this matter; the greatest responsibility rests with the individual citizen. And until individual citizens in far greater numbers than at present discharge that responsibility, humanity must pay the price, and this terrible blot rest upon our much vaunted civilization.

Way to Ease Headaches, Pain Almost Instantly

METHOD OFTEN RELIEVES NEURALGIA AND RHEUMATIC PAINS IN MINUTES!

Remember the pictures below when you want fast relief from pain. Demand and get the method doctors prescribe—Aspirin.

Millions have found that Aspirin eases even a bad headache, neuralgia or rheumatic pain often in a few minutes!

In the stomach as in the glass here, an Aspirin tablet starts to dissolve, or disintegrate, almost the instant it touches moisture. It begins "taking hold" of your pain

practically as soon as you swallow it. Equally important, Aspirin is safe. For scientific tests show this: Aspirin does not harm the heart.

Remember these two points: Aspirin Speed and Aspirin Safety. And, see that you get ASPIRIN. It is made in Canada, and all druggists have it. Look for the name Bayer in the form of a cross on every Aspirin tablet.

Get tin of 12 tablets or economical bottle of 24 or 100 at any druggist's.

Why Aspirin Works So Fast

IN 2 SECONDS BY STOP WATCH
An Aspirin tablet starts to disintegrate and go to work.

What happens in these glassed tablets start "taking hold" of your pain a few minutes after taking.

When in Pain Remember These Pictures

ASPIRIN IS THE TRADE MARK OF THE BAYER COMPANY, LIMITED

Recommended As Reducer

In Seventeenth Century Tea Was Supposed To Be Stimulating

Tea, in the seventeenth century, was recommended as a means of stimulating. In an exhibition now in the Victoria and Albert Museum, London, of English silversmiths' work is quoted an old advertisement which says that China Tea, or Tey, was "of great avail to men of corpulent bodies and to such as eat meat." Apparently the ladies were not so keen on slimming in those days. Tea-drinking, anyhow, must have been rather a trial when it was first introduced into this country, for the small bowls out of which the liquid was drunk had no handles, and people were compelled to hold them by the lip or poised in their fingers.

Try KRUSCHEN NOW!

At no expense to you

If you suffer from rheumatism, sciatica, lumbago or neuritis you should try Kruschen Salts right away because your druggist is offering a FREE trial of Kruschen for a limited time only. Ask him for the Kruschen Giant Package which contains a regular bottle and a FREE Trial Bottle. After using the Trial bottle, continue with the Regular bottle—because you are not completely convinced that Kruschen will do everything claimed for it, in which event your druggist will return your money if you take back the regular package unopened.

But millions of people testify as to Kruschen's effectiveness, for in 119 different countries nothing else has been found that gives the same results as Kruschen. Get your package without delay. The supply of Free Trial bottles is limited.

A Wonderful Machine

A scientist in Sweden claims to have invented a machine, somewhat similar in appearance and action to a typewriter, which can produce and transcribe coded messages many times faster than by hand. These messages cannot be deciphered other than through the use of a similar machine identically adjusted.

MAKES FALSE TEETH FEEL LIKE NATURAL

There must be a reason Dr. Werner's Powder is the world's largest seller and prescribed by leading dentists: it holds teeth so firmly they fit so comfortably that all day long you forget you ever had false plates. Leaves no colored, gummy paste—keeps mouth sanitary, breath pleasant—the best powder you can buy yet cost is small—say druggist.

Census Taker Turns Dentist

Extracted Teeth For Indians During Tour Of James Bay Area

When Rev. J. Emile Saindon went to work for the Dominion Bureau of Statistics, he was a competent census taker, but to-day, as a result of his official labors, he is a first-rate amateur dentist.

He was engaged by the bureau to take a census of the Indians living along the eastern shore of James Bay. But he found that wherever he went in pursuit of figures, he was met by appeals from redskins to extract their aching teeth.

At one remote spot he sat down and solemnly pulled out Indians' teeth for several hours. Altogether he made more than 100 extractions during his tour.

Making It Clear

K. C. Banks proposed to post himself to British Columbia, and thought it advisable that he should be marked: "This way up." In the event of his deciding on air mail, and yet wishing to wear a hat, the following note on past history may be useful. Toward the end of the war a gadget was obtained for the R.A.F. which the makers marked: "To be stored upside down." The air ministry added the instruction: "To avoid confusion, the bottom should be called the top."

Heart disease held third place among causes of death in the United States in 1900; in 1930 it had become the leading cause.

American medical authorities have contradicted the well-known theory that we get indigestion if we drink water with our meals.

Exhibition Of Inventions

Rubber Collar Stud One Of New Gadgets Shown

A humane collar button guaranteed not to torture the wearer by digging into his neck, was among hundreds of newly patented devices displayed at the Exhibition of Inventions, which was opened in London recently.

Made of rubber, the new stud is attached to the shirt to make dressing easier, and its inventor says it can withstand laundering.

Most of the exhibits were gadgets to make housekeeping simpler. There was a combination brush and pan that lifts dust by pressure on the handle, an automatic window cleaner that does away with the use of a squeegee, and a self-emptying bread box.

One ambitious entrant exhibited double-sided neckties, and another showed an egg-opener that lifts the top of a boiled egg neatly off without cutting the yolk.

But there were more pretentious exhibits, too. One was a four-legged frame on wheels for teaching the baby to walk. Another was a "visual piano" with apparatus that produces color corresponding to the notes and rhythm of the music.

A hopeful inventor from Somerset exhibited a new device for trepanning, which he said was already being used in several hospitals.

The British building boom was reflected in an unusual number of simple locks for doors, sink filters, adjustable draught excluders and new compositions for making bricks.

A "charivari" means a tin-pan serenade. These serenades are still used among some French villagers as a means of protest to an unsuitable marriage taking place in the village.

Only 94 Englishmen have an income of more than \$500,000 a year; 89,790 earn more than \$10,000 a year, however.

Old Reliable Remedy Still Best For Chapped Skin

Rough, chapped hands are irritating and ugly. They are also a source of danger from infection, when the skin becomes very raw and cracked from exposure.

The old reliable remedy—Hinds Honey and Almond Cream—is still a favorite remedy after being on the market for over 60 years. Ever since 1875 this soothing, healing lotion has been the choice of men and women in every walk of life, for its instant relief from suffering, rapid healing and remarkable protective qualities.

In cold weather, hands, neck and face need protection to keep them free from chapping and danger of infection. Hinds Honey and Almond Cream is easy to use—quickly absorbed by the skin and leaves no trace of stickiness. Men like it after shaving. Any druggist can supply you.

New York's 4,000 fur dealers manufacturers and importers are concentrated in a three-block section of the city.

Expectant Mothers

Mrs. Wm. Arthur of 25 Victoria St., Stratford, Ont., says: "I am the mother of ten children and Dr. Pierce's Favorite Prescription brought me through each period of expectancy in the best of health. It helped to drive away that nervous, unattractive condition and the ache in my back; it also strengthened my entire system." Write to Dr. Pierce's Clinic, Buffalo, N. Y., for free medical advice.

A pocket-sized wind gauge is a device being used by aviators in Russia.

FREE—The "Royal Yeast Baking Book" to use when you bake at home. 23 tested recipes—loaf breads, rolls, buns, coffee cakes! Address Standard Brands Ltd., Fraser Ave. and Liberty St., Toronto, Ont. Ask, too, for leaflet, "The Royal Road to Better Health."

Buy Made-in-Canada Goods

European Countries Showing Some Sign Of Relaxing Nationalistic Trade Policies

Germany, Italy and France are showing signs of relaxing slightly their nationalistic trade policies, in the opinion of Dr. T. W. Grindley, chief of the Dominion bureau of statistics' agricultural division, who was a Canadian delegate at the Bad Eilsen conference of agricultural economists. But otherwise little indication of a relaxation in tariff and other trade barriers in agricultural products was visible at the party.

"Dr. Grindley went to Bad Eilsen accompanied by Dr. E. A. Atome, professor of agricultural economics at Macdonald College, and Dr. W. A. Aen, professor of farm management at University of Saskatchewan, after attending the London wheat conference with John I. McFarland, head of the wheat pools' central selling agency. Views held by economists at the conference in Germany were 'highly interesting' in the light of the world wheat situation, he said.

Internal conditions responsible for slackening of rigid trade policies in Germany, France and Italy were outlined by Dr. Grindley. Germany had a short crop, and has to import wheat, rye and coarse grains, some coarse grain coming from Canada, but most of it from Poland under a bi-lateral treaty.

Although France has a heavy surplus of soft wheat, hard wheat is needed for milling purposes, and that country is ready to take Canadian hard wheat. A broadening out of Mussolini's agricultural program in Italy indicates a lessening of the emphasis placed on wheat production there. Italy's wheat barriers may be somewhat relaxed as a result.

While fear of war cutting off food supplies may have been a factor in the initiation of the present agricultural policies in Europe, Dr. Grindley believes it is no longer an influence. The main idea seems to be to keep the large agricultural populations of Europe contented and prosperous.

From this point of view the policy pursued has been undoubtedly effective. Farmers in Great Britain and Germany are highly prosperous. Comparatively, he said, the United Kingdom has not gone as far as other European countries in tariffs, but has gone farther in quotas and fixed prices. French and Belgian farmers with their small holdings cannot be compared readily with Canadians, but they too are benefitting from assistance and protection.

Sows Wheat From 'Plane

Soviet Union Finding Method Successful Over Wide Area

More than a million acres of grain, in preparation for the harvest of 1935, will be sown in the Soviet Union from aeroplanes.

Air-sowing, first tried experimentally in 1931, now has been declared a success. In the quality of work sowing from aeroplanes equals that done either by hand or by tractor-drawn machines, the government's agricultural experts have found.

And the speed with which the job can be done is greatly in excess of any other method.

In 1933, it has been announced, each aeroplane engaged in sowing seeded between 1,000 and 1,250 acres in a day, planting a total of 1,000, 110 acres, an area that will be somewhat increased for 1935.

In addition, it is declared, districts sown from the air showed a yield 10 per cent greater than similar fields sown by hand.

Aeroplanes equipped for grain planting carry seed in large tanks from which it drifts down to the land. Best results, it has been determined, are achieved when pilots keep an absolutely straight line between two markers set up to guide them, and shelve the ground as closely as possible.

Also among the advantages claimed for the new method is that, from aeroplanes, super-early sowing—an important advantage in view of the short Russian summer—is possible.

Aeroplanes, it is pointed out, can pass over and seed fields which are inaccessible to heavy machinery because of the mud and melting snow.

W. N. U. 2070

WHAT DOES YOUR HANDWRITING REVEAL?

By LAWRENCE HIBBERT

(Graphic Analyst)

(All Rights Reserved)

(Editor's Note: Not for a long time, has a series of articles aroused such interest as this series on Character from Handwriting. Hundreds of readers have written, requesting a personal analysis of their own writing, and the author invites you to send in for a reading. See the announcement at the foot of the article.)

This week, a gentleman from out west wrote to ask me for my advice. He is a widower, with two young children, and feels that he should marry again, so that his children will have the proper attention.

He has been corresponding with several ladies, and sends me specimens of his own writing, and that of his several correspondents, with a view to finding which one is most suitable for him.

His own writing is that of a quiet unassuming man. There is little egotism shown in his writing, and he is of a rather shy nature, somewhat aloof—not because he does not feel things, but because his nature is reserved. He has a deep capacity for feeling, but is backward in expressing that emotion.

His nature has a good deal of generosity. And he has a very cultured mind. He likes good literature, and he will have an especial fascination for him.

The writing of the lady I shall call No. 1 shows a very emotional nature. She is at the beck and call of her emotions. She has a quick temper, and she flares out at any time, and will very likely do things, and say things, in that mood, for which she will be sorry afterwards—after the damage is done.

She is generous, and there is a good deal of affection in her nature. And she craves company. She must be always on the go.

Here is the type that expresses itself in longer parties, organizing fairs and social gatherings. She will be in her element as a club organizer.

Taking up the writing of No. 2, I find a totally different personality. She has an even temperament, well-balanced and unlikely to be either too reserved on the one hand, or of the hysterical type on the other. She has a natural and normal temperament.

She displays quite a lot of generosity, has a good deal of enthusiasm, but will rarely get excited. She has a neat and orderly mind, and is a good home-builder. She is, in fact, a good housewife. She is also kindly, and is considerate of others.

I do not have to devote very much attention to No. 3. Her writing tells me at once that she is unreliable. She is very deceitful, and shows marked attention to her own interests. She looks after herself, first, last and all the time.

I think my readers will have little difficulty in judging which of my correspondents' lady friends is recommended. No. 2 lady has all the qualities that will make my correspondent happy. She will not jar his susceptibilities; she will be kind and attentive to his children, and she will make him a good wife.

Let this well-known Graphic Analyst tell you the secrets revealed by your handwriting. He will also tell you what your friends are really like. Send specimens of the writing you want analysed, and enclose the coupon for each. Send with 30 stamped addressed envelopes, to: Lawrence Hibbert, care of Winnipeg Newspaper Union, 175 McDermott Ave., Winnipeg, Man. All letters are strictly confidential, and replies will be sent as soon as possible, but please allow about two weeks for your reply.

Some Alberta Products

Coal, Petroleum and Timber Among Important Industries

Alberta is famous for its wheat, livestock, and mountain scenery, but it has other resources which are the basis of a substantial and increasing industry. Total coal production in Alberta for the eight months ended August 31, this year was 2,574,436 tons, compared with 2,497,168 tons for the same period last year. The eight-month production of petroleum for this year was 852,228 bbls. compared with 832,454 bbls. in the eight-month period of 1933. Timber production for the 1933-34 fiscal year showed an improved condition over that for the 1932-33 fiscal year, lumber production being 53,308,052 board feet compared with 52,736,467 board feet in the previous year. Other lines of timber products showed similar increases.

Great Health Resort

Waters Of The Dead Sea Said To Have Rejuvenating Qualities

The extraordinary vitalizing properties of the waters of the Dead Sea were referred to by Major T. G. Tulloch, R.A., in a lecture recently before the Royal Society of Arts.

"It is not only charged to the extent of twenty-five per cent. with salts having beneficial medicinal properties, but is also highly radio-active."

"The effect of a bath there is very remarkable, for it has an extraordinary rejuvenating effect, and although it is hardly credible, I have seen people emerge looking years younger than when they went in an hour earlier."

"Many business men come down every evening after their work for a swim, for they find that the amazing 'tonic' effect of the water strengthens them mentally and physically in a very short time."

The fact that the northern shores of the Dead Sea and its neighbors are so healthy is due apparently to a number of causes. The main reason is thought to be its great depth below sea level (the Dead Sea is 1,300 feet below the Mediterranean), and the climate there is thus unique, while there is sixty-five per cent. more oxygen in the air there than any other open place in the world.

Finds People Honest

Illinois Farmer Says Stranded Car Drivers Play Fair

Oscar Martin, farmer residing near Mason City, Illinois, has developed a great confidence in the honesty of the motoring public as a result of ten years of contact with motorists.

Living near a state highway, Martin has been called on frequently late at night by motorists whose gasoline supply has given out. He always has kept a can of gasoline in an accessible place for such callers.

When a motorist calls at Martin's home late at night, Martin simply directs the person to the location of the gasoline supply and goes back to sleep. Over a period of ten years Martin has yet to accommodate a motorist who did not return the gasoline can and leave sufficient money to pay for the fuel obtained.

Losses from forgeries now total more than \$250,000,000 annually.

A Co-Ordinated Health Program For Canada Being Urged By The Leaders Of Welfare Groups

A co-ordinated health programme for Canada, wherein present health machinery would work more smoothly under a comprehensive nationally organized effort to preserve health and prevent disease, was urged by preachers, physicians, provincial and civic officials, and leaders of welfare groups in a series of addresses under the auspices of the Canadian Social Hygiene Council in Toronto during the last two weeks.

Suggestions ranged from formation of "a national health council" to stimulate provincial programmes and correlate them with the federal department of health, to a general programme of health education by governments and independent health organizations. There were more than 50 speakers, including the Mayor of Toronto, justices, judges and health directors of independent bodies. Organizations represented included the Canadian Red Cross Society, the National Council of Women, the Social Hygiene Council, city and provincial health departments, churches, independent welfare bodies and the Young Women's Christian Association.

It was contended by speakers that the value of health education had been proved by results of programmes directed to the prevention of venereal diseases, tuberculosis, diphtheria, typhoid fever, and so forth, and that Canada's daily list could be cut in half if present knowledge and equipment for disease prevention were made available to the public.

Premier Bennett was commended for placing national health before the forthcoming inter-provincial conference of premiers and support was urged to any move which might emerge from the conference towards broader health education.

More than 16,000 persons who heard the addresses, delivered during the showings of "Damaged Lives", a health educational film, endorsed petitions which were forwarded to Ottawa urging representatives at the conference to give national health the utmost consideration.

From an economic as well as a social standpoint health preservation was a national benefit, speakers said. There are 21 million workdays lost annually through illness, which cost the nation for doctors' bills, hospitalization and lost working capacity more than a billion dollars. Also, it was pointed out, there is a relation between illness and indigency which burdened the taxpayer.

Educational programmes sponsored by the Canadian Social Hygiene Council had been of tremendous benefit in improving civic health, Mayor W. J. Stewart said. He credited the Council with having pioneered public interest in health throughout the Dominion, and said that no city could be prouder of any organization than Toronto was of the Council. Its leadership should be followed by a national movement along the same line, he said.

Canada spent annually \$311,000,000 in an attempt to cure illness, but only \$6,000,000 in its prevention, Dr. J. W. S. McCullough, Chief Health Inspector for Ontario, pointed out. It is equally well-known that education is the best method of stimulating interest in health.

Knowledge of disease prevention should not be "the prerogative of the few but the right of the many", stated Dr. J. T. Platt, Director of the Child Hygiene Division of the Ontario Department of Health. "Sound public health leadership from above" and "urging from below" alone would achieve successful distribution of health knowledge, said Dr. L. A. Piquenat, Deputy Medical Officer of Health of Toronto.

Other physicians who spoke included Dr. R. S. Pentecost, past president of the Toronto Academy of Medicine, who said the whole future of medicine lay in prevention; Dr. A. L. McKay of the Provincial Department of Health, who urged each citizen to assume individual responsibility for personal and national health; Dr. Gordon P. Jackson, Medical Officer of Health for Toronto; Dr. George Porter, Health Director for the University of Toronto, and Drs. Alan Brown and F. F. Tisdall, nationally known child specialists.

Women physicians and welfare workers who urged "a women's crusade for health" included Mrs. Mildred Newell of Edmonton, public health convener for the National Council of Women; Dr. Helen MacMurchy, O.B.E.; Mrs. Percival Foster, field secretary of the National Council of the Y.W.C.A.; Dr. Minerva Reid, Toronto school trustee; Mrs. W. R. Jackson, president of the Silver Cross Women of the British Empire; Miss Edna Moore, chief public health nurse in the Child Hygiene Division of the Ontario Government; and Mrs. J. P. Hynes, president of the Local Council of Women.

A relationship existing between delinquency and ill health was stressed by Judge H. S. Mott of the Toronto Juvenile Court and Hon. Mr. Justice Riddell; and the economic aspect of illness as it affects labour was presented by Controller Jas. Simpson, vice-president of the Trades and Labour Congress of Canada.

Religious leaders who declared that morality was strengthened by health included Rev. R. B. Cochran, national home mission secretary for the United Church of Canada, and Rabbi Maurice Eisendrath, one of the best known Jewish leaders in Canada. Dr. Cochran declared that his experiences in Western Canada had induced him to believe there was more need for governmental assistance in medical services to citizens than ever before.

Railway Fog

When dawn fog becomes a "railway fog"? An official of the London and North Eastern Railway has explained that it becomes "official" the moment a signalman cannot see a fixed signal 200 yards away. The signalman informs his station-master, and the station-master summons his foreman to lay detonators as long as the fog lasts. For fog services there are special timetables which reduce the number of trains by a quarter and lowers their speed—C.N. Railway Magazine

The SNAPSHOT GUILD

ANIMAL PICTURES

Although this snap was made in a zoo, it has all the "feel" of reality, because the

Animals—far from household pets to jungle giants—afford ideal snapshotting. For animals don't pose; they are always entirely natural and, as though they were puppets in a marionette show, they are the finest "actors" in the world for the simple reason that they do not "act".

To get good pictures of any animal the first essential is patience. It is quite possible that the family dog will stand up obligingly for you on command, but in picturing all other animals you'll find it necessary to wait for the picture you want.

And this brings us to the question—what do you want in an animal picture?

Ten or fifteen years ago there was a great fad for picturing kittens in all sorts of outlandish poses. The poor little tykes were dressed up, propped up, and photographed as though they were puppets in a marionette show. To most people, however, pictures of animals as they really are have a much more appeal. You will probably prefer to snap a kitten as it plays with a string or a dog wriggling with a big stone.

Domestic animals, of course, offer few real camera difficulties, for you can get them to do almost anything you like. Open shade, on a bright day, will be found best. As

for shutter speed (if your camera has variable speeds), you'll need 1/25th of a second or faster, to catch fleeting poses and expressions. Unless the light is exceptional, better work with the lens wide open.

To snap less controllable animals—squirrels, birds and such—you'll need greater patience and cunning. Much depends on background and on your distance from the subject. At more than ten feet, for example, a squirrel becomes almost invisible unless it is sharply revealed on a branch, with the sky for background. Obviously, you'll need to use a fast shutter; squirrels move too swiftly for slow snaps.

The zoo can be a happy hunting ground, too. In many cases, you'll be able to shoot through or over the bars of cages, obtaining clear, unobstructed snaps. In some cases "natural" settings for the animals have been built, you can get pictures comparable to those that Martin Johnson and Frank Buck travel months to find.

Use a modern, color sensitive film. You'll need all the detail you can get and the utmost in color value rendering. Otherwise you'll find your pictures of a cinnamon bear looking very much like one of a black bear.

WORLD HAPPENINGS BRIEFLY TOLD

Hon. Herbert Marler, Canadian minister to Japan, and Mrs. Marler, have returned to Tokyo.

Approval by the governor-in-council of a scheme for the regulation of the marketing of dry salt herring and dry salt salmon produced in British Columbia was announced.

Ottawa will become the headquarters of the order of St. John with establishment there of a commandery. Dr. Charles Copp, Toronto, commissioner of the order in Canada, announced.

In a letter sent to Prime Minister R. B. Bennett, the Toronto central council of ratepayers' associations urges amalgamation of parliament in a federation of parliament to combat present conditions.

Protesting the cut in the relief allowance under the federal "hump run" policy, the city council of Edmonton passed a resolution demanding that the Dominion government assume its full responsibility in handling the problem.

Henry Wallace, U.S. secretary of agriculture, asserted the United States must look to "increase purchasing power" rather than to lowered prices on cotton if it is to maintain markets abroad for its usual annual export of 8,000,000 bales.

Mostly Pedestrians
More than 7,000 road accidents which resulted in 7,202 deaths were analyzed by British police, who found that only 219 of the dead were drivers of motor cars, while, 3,517 were pedestrians, 1,324 bicyclists and 1,308 motorcyclecyclists.

HOW TO AVOID ILLNESS

When you begin to feel fagged out at the end of the day, look out. Illness is just around the corner waiting to lay you low. At times like this there's nothing like Wincarnis, the great tonic that has won over 20,000 recommendations from medical men. Wincarnis is a delicious wine, not a drug. In each bottle there are all the nourishing elements of 25 lbs. of grapes added to the strengthening elements of beef and guaranteed malt extracts. These elements in Wincarnis will quickly restore lost energy. They will help you to sound sleep, vigorous awakenings and active, enjoyable days. Drink this delicious wine regularly three times each day, and soon your will drop from your shoulders. To pick you up when you are out of sorts, to soothe your nerves, enrich your blood, or in cases of nervousness, insomnia, anaemia and debility, take Wincarnis. At all drug stores—Sales Agents: Harold F. Ritchie & Co. Ltd., Toronto.

The moon was believed to be made of glass before the invention of telescopes. The dark markings on it were thought to be the reflection of land and sea areas on earth.

Little Journeys In Science

DYES

(By Gordon H. Guest, M.A.)

Recently a French silk manufacturer displayed eighty-six different shades of the color green, showing to what perfection the art of dyeing has been brought. Thought to have originated in India many centuries ago, dyeing was at first confined to the production of just three colors, red, obtained from the madder plant; blue from indigo, and purple, from shellfish. These early dyes were of fine quality and are still to be seen in the mummy cloths in arcaic collections. These cloths glow with rich colorings of purple and red.

In the city of Florence, Italy, a method of preparing purple dye from certain lichens was discovered in the thirteenth century, and in 1472 the first dye company was incorporated in London. It was not, however, until the eighteenth century, when scientists interested themselves in the perfection of dyeing processes, that the industry became the important one that it is to-day. Coal-tar products were introduced into the process in 1856 by a young British chemist, William Henry Perkins. Perkins was working with aniline, a substance taken from coal tar, in an effort to find a quinoline instead, he discovered amazing coloring properties of certain aniline compounds, which led to a broader field, revealing dye properties in a large number of coal tar products. His work, which resulted in cheaper and more versatile dyes, brought him a fortune and a knighthood, while industry was further revolutionized by the utilization of coal tar, which had hitherto been considered useless.

Artificial dyes are superior to those found in nature, because of their much greater variety and adaptability, qualities which are continually being further developed in chemical laboratories.

Might Try New Way

He was taking his girl friend to the opera for the first time, but he thought it would be the correct thing to act like an every-week attendant.

"Have you ever tried listening to the opera with your eyes shut?" he asked his fair companion, as a particularly fine aria was sung.

A voice from over his shoulder boomed out: "Young man, have you ever tried listening to the opera with your mouth shut?"

OFF COLOUR? HOW IS YOUR LIVER?

Wake up your Liver Bile

—Without Calomel

Your liver's a very small organ, but it certainly can get your digestive and eliminative organs out of kilter by refusing to get rid of its daily five pounds of liquid bile into your bowels. You won't completely correct such a condition by purging with salts, or laxatives, or cathartics, or anything else, or anything else. When you've moved your bowels they're through—and you need a liver stimulant.

Cartier's Little Liver Pills will soon bring back the sunshine into your life. They're purely vegetable. Safe, sure. Ask for them by name. Read the instructions. See at all drug stores.

Travelled By Plane

Apparently unconcerned with his Journey, Toto, 268-pound baby elephant, was taken by airplane to St. Louis by Mr. and Mrs. Martin Johnson and turned over to the St. Louis Municipal Zoo. The Johnsons, noted big game hunters, flew the animal there in their own plane from New York.

During the past winter, Kentucky commissioned more than 50 new "Colonels", bringing the total of honorary aids to the governor of that state commissioned in the past 10 years to 3,226.

A saxophone eighteen feet long is reported to be in use somewhere along the Pacific Coast of the United States. With equipment of that sort along the ocean shores there is hardly need for defensive coast artillery.

SUNDAY SCHOOL LESSON NOVEMBER 4

CHRISTIAN GROWTH

Golden text: "But grow in the grace and knowledge of our Lord and Saviour Jesus Christ." 2 Peter 3:18. Lesson: Luke 2:42-52; 2 Peter 1:5-8. Devotional reading: Proverbs 4:10-19.

Explanations And Comments

How Jesus Grew, Luke 2:42-52. For thirty years the life of Jesus was uneventful. He lived in Nazareth among the hills of Lower Galilee, and wrought at Joseph's bench as a carpenter. The only event in all that time that has been recorded is his going to Jerusalem, eighty miles southward, to keep the Passover with Mary and Joseph. The story of that Passover we have studied four times in the last year, and explanations are not needed.

The account closes with these words: And Jesus advanced in wisdom and stature, and in favor with God and men. God chose to send his Son into the world as helpless babe to attain a perfect Manhood through all the natural stages of human growth, physical, mental, and spiritual. He was larger and wiser at twelve than at two, and at thirty than at twelve; he had a glimpse of his high calling at twelve which he did not have at two, and a realization of it at thirty which he did not have at twelve.

Exhortation to Growth in Righteousness, 2 Peter 1:5-8. God hath granted unto us all things that pertain unto life and godliness, through the knowledge of him that called us by his own glory and virtue; whereby he hath granted unto us his precious and exceeding great promises; that through them ye may become partakers of the divine nature; these are the words that precede our text. Now we read that for this very cause, because God has granted all this, there is much to be done on our part.

What shall I render unto Jehovah For all his benefits toward me? The Psalmist questions. There is much that I must render. They call for wisdom, for strength, for my part, first, in my faith to supply virtue. The Authorized Version exhorts us to add one virtue to another, but the Greek means "to develop one virtue in the exercise of another." Each grace here mentioned is contained in the next, "as a series of Chinese boxes." As we address ourselves to the acquisition of one grace, it becomes a source out of which we can develop another. Everything in Christian experience is orderly and progressive. Each quality is a kind of soil or atmosphere in which its successor is nourished." (John Gardner).

Answer That

A well-known Royal Academician, who noticed a drawing of a fish by a pavement artist, asked the man what sort of a fish it was supposed to be.

"A shark, sir!"

"But you've never seen a shark," said the R.A.

"That's true, sir," the man agreed; "but then, don't some of those Academy chaps paint angels?"

Only persons who are teetotalers, non-smokers and vegetarians will be allowed to settle in a new town to be built near Prague, Czechoslovakia.

Too Much Uric Acid

is a very common cause of Rheumatism, Sciatica, Lumbago. Drained kidneys allow an excessive amount of uric acid to accumulate. Take Gin Pills to give relief while they are assisting your kidneys to function normally.

Post office boxes are carried on the backs of all street cars in Stockholm, Sweden; when the car passes the post office a clerk removes the box and replaces it with an empty one.

Hubby—I admit, dear, I didn't get home until 5 o'clock.

Wife—I know it!

Hubby—That's why I admit it.

A Law Every Mother Should Know and Observe

Never Give Your Child An Unknown Remedy without Asking Your Doctor First

According to any doctor you ask, the only safe way is never to give your child a remedy you don't know all about, without asking him first.

When it comes to "milk of magnesia," that you know everywhere, for over 60 years, doctors have said "PHILLIPS' Milk of Magnesia for your child."

So—always say Phillips' when you buy. And, for your own peace of mind, see that your child gets this the finest men know. Made in Canada.

Safely for You and Yours

You can assist others by refusing to use any other than the genuine Phillips' Milk of Magnesia. Be sure you get the genuine—made in Canada—and in the interest of general public in general.

PHILLIPS' Milk of Magnesia.

A Book You Should Own

A collection of famous formulae and simple methods. Seven leading departments thoroughly indexed.

Recipes for the home cellar, the drugist, the chemist, toilet articles, the household, farm and dairy, all trades and professions. NOT A COOK BOOK. This valuable collection of standard formulae has been carefully built up over a long period of time, resulting in the most complete book of formulae of this sort ever compiled. Size 3 1/2 x 5 1/2. 368 pages.

TO ESTABLISH AN OPEN LONDON GRAIN AGENCY

Winnipeg.—Establishment of a grain agency at London will be entirely independent of Canadian wheat pools and other export agencies, David L. Smith, former foreign representative of the pools' central selling agency, said here. He will sail for England early in November.

Mr. Smith will operate as an independent private trader. At London he will establish a sample market where Canadian grains can be inspected and their qualities discussed with European buyers. Through this medium he is hopeful of establishing a contact that will assist materially in the sale of Canadian wheat and other grains abroad.

In England Mr. Smith acts as the accredited representative of a number of Canadian export houses, including the Alberta and Saskatchewan wheat pools. He believed earlier report which said the agency had been decided upon as a joint effort of several Canadian export houses and the two pools, carried a wrong impression. He will act as salesman on his own account.

Calgary.—Establishment of David L. Smith, of Winnipeg, as a grain agent in London to increase sales of Canadian grains will be entirely independent of the Alberta wheat pool, R. D. Purdy, manager of the pool, said. Anything Mr. Smith may accomplish will be separate from the pools' efforts in the export field.

"Mr. Smith is going to London as a salesman on his own account, I understand," Mr. Purdy said. "If he succeeds he may be able to do some business with us. But I would like to make it clear that he is entirely independent of the Alberta wheat pool."

Taxes On Range Lands

New Base For Levy Urged Before Alberta Board

Calgary.—A plea that taxes on range lands be levied according to productive, rather than to fictitious value of land was made by Jack Byers, of the Western Stockgrowers' Association, when he appeared before the Alberta tax inquiry board which was holding sessions in Calgary.

Mr. Byers also urged that arrears of taxes be worked out in forms of range improvements which would promote more efficient land utilization, and that there be a flat rate of taxation that stockmen can afford to pay, with proper provision for collection.

Millions For Air Force

Italy Has Authorized Expenditure For 'Planes And Material'

Rome.—New authority in the air for Italy was provided for by Benito Mussolini, acting as minister of aviation, and Guido Jung, minister of finance, in a bill they presented to the chamber of deputies.

The bill authorizes the expenditure of 1,200,000,000 lire (\$300,000,000) for "the complete renewal of aeroplanes and accessory material."

Regulate Potato Marketing

Ottawa.—A decision to apply for the setting up of a scheme under the Natural Products Marketing Act to regulate the marketing of potatoes in eastern Canada was practically reached at a session of the potato conference, representing growers, dealers and governments in Ontario, Quebec, Nova Scotia, Prince Edward Island and New Brunswick. The conference is attempting to work out plans of orderly marketing for the present bumper potato crop in order to ensure the farmers as good a possible a return.

Debaters Start Tour

Halifax.—Opening a debating tour which will take them across Canada, two English undergraduates, Robert son Christian of Oxford and Leslie Jackson of Cambridge defeated Dalhousie University when they upheld the affirmative on the subject: "Resolved that this house deprecates the rise of Fascism."

W. N. U. 2070

Flight Was A Success

Trip Into Stratosphere Quite Satisfactory Stated Mrs. Piccard

Cadia, Ohio.—The stratosphere flight of the Jean Piccard came to an end in a tree-top. The bag of their balloon was badly torn, but the gondola and valuable instruments were undamaged and the Piccards themselves were unhurt.

The Piccards, saying they believed the purpose of their flight had been accomplished, brought the huge bag down after a flight that started from Detroit and carried them an estimated 10 miles into the air.

"The flight was a success," said Mrs. Piccard soon after she climbed from the gondola which settled amid trees near an old logging road on the John Fulton farm, four and one-half miles southwest of here.

Glen Copt, a farmer, made a valiant attempt to halt the balloon as it drifted slowly a short distance above the ground, its ropes dragging.

He grabbed a rope and attempted to tie it to a tractor. The floating balloon pulled the rope from his hands and the balloon then scraped the top of a 75-foot elm, the branches tearing the bag badly but not damaging the gondola. The landing, while rough, merely shook up the Swiss scientist and his wife.

For Naval Equality

Japanese Present Their Claim To U.S. Representatives

London.—The Japanese presented their claim for naval equality to representatives of the United States, as they had done in meetings with the British. No action was taken and no official statements were issued, but it seemed obvious that a long and knotty discussion faced the representatives of the world's three leading naval powers.

British and Americans feel that the existing treaties already contain sufficient guarantees for equality in security. Japan would sweep away the existing treaties and replace them with an entirely new structure.

In a nutshell, Japan is firm in its determination to remove the existing ratio basis, on which naval categories of Britain, the United States and Japan are fixed on a 5-5-3 ratio respectively. If the other powers will not join in her abrogating the Washington treaty, then she will abrogate it unilaterally—indisputably.

Community Chest Campaign

Relief For Families That Might Otherwise Be Destroyed

Vancouver.—"There are families today who are in danger of complete disruption," G. G. McGeer, K.C., M.L.A., declared in a public address in behalf of Community Chest campaigns now in progress in various cities of Canada. "In their homes the health of children is being imperilled."

"Now," Mr. McGeer continued, "whether this condition arises from lack of income or from other cause, wise private social service not forced upon the family by the government can often bring relief that means the rehabilitation of a family that might otherwise be destroyed."

United Farm Women

Mrs. Goodale Heads Organization In Manitoba

Brandon, Man.—Mrs. M. J. Goodale, Portage la Prairie, was re-elected president of the United Farm Women of Manitoba at its annual convention here. Mrs. E. L. Johnson, Arbor, was re-elected vice-president.

Discussions on naturalizations, sterilization of mentally defective persons and problems of the farm occupied the delegates. Resolutions of the organization will be submitted to the general session with the United Farmers of Manitoba for consideration.

Another Air Race

Paris.—The air ministry announced a great international air race will be organized by France to give the industry of the country, unrepresented in the Melbourne air derby, an opportunity to demonstrate that it holds a place in the forefront of progress.

BRITAIN'S ENVOY

Sir Frederick Leith-Ross, Chief Economic Adviser to the British Government, who heads the delegation which is in Berlin initiating discussions on the commercial and financial relations of the two countries, as affected by the new German machinery for the control of imports and the allocation of foreign exchange.

Win Air Derby

England's Brilliant Airmen Finished First In Handicap As Well As Speed Race

Melbourne, Australia.—An unofficial check indicated England's brilliant airmen, C. W. A. Scott and T. Campbell Black, finished first in the handicap as well as the speed race in the Engad-Melbourne derby. Their official time was 70 hours, 59 minutes, 50 seconds.

But the Dutch entry, which came in 19 hours and 18 minutes behind Scott and Black, and two hours and 42 minutes ahead of the American team of Col. Roscoe Turner and Clyde Pangborn, stands an excellent chance of getting the handicap first prize of \$10,000.

Under the rules for the derby a pilot cannot win prizes in both races, but must choose between them.

Should Pangborn and Moll get the \$10,000 handicap prize, the second prize of \$7,500 in the speed race would go to Turner and Pangborn. At any rate the Americans are assured of the \$2,500 third prize in the speed race.

Would Build For Defence

Washington.—Japan is preparing to demand an agreement under which the three leading naval powers would build no more "offensive" vessels. This became known in an authoritative source as details of the Japanese position at the naval conversations in London were disclosed.

Trial Starts In January

Flemington, N.J.—Bruno Richard Hauptmann entered a personal plea of not guilty to a charge of murdering the kidnapped Lindbergh baby, and Supreme Court Justice Thomas E. Trenchard fixed January 2, 1935, as the date for trial.

NEW ZEALAND'S GOVERNOR-GENERAL AT HOME

Here is a picture of Viscount and Viscountess Galway with their children in the grounds of their home, Serilly Hall, Bawtry, Yorkshire. The King has approved the appointment of Viscount Galway to be Governor-General of New Zealand in succession to Lord Bledisloe, whose term of office expires shortly.

Drouth In China

Damage Is Expected To Reach Amount Exceeding \$1,200,000,000

Shanghai, China.—The losses to the Chinese farmers and peasants occasioned by the prolonged drouth and record heat wave of the past spring and summer are expected to exceed \$1,200,000,000, according to a report issued by the national famine relief commission, which is based on reports received from the stricken districts.

In the 10 provinces, 263 districts have sent in reports declaring a total of approximately 26,750,000 acres of cultivated lands have been affected by the drouth.

When all surveys are completed it is expected the drouth losses will reach a more appalling total than even the very pessimistic estimate of the national famine relief commission.

A survey conducted by the department of agricultural economics of the national agricultural research bureau of the ministry of industries reveals the damage caused by the drouth in the two provinces of Kiangsu and Chekiang alone is in excess of \$528,800,000. The area affected in these two provinces is only about one-third of the total area of the 10 provinces hit by the drouth.

Reduce Liquor Prices

Manitoba Commission Faced With Competition From Bootleggers

Winnipeg.—An intensive police drive on bootleggers is under way as the Manitoba government liquor control commission, faced with severe competition from this source, announced reduced prices on Canadian gin sold in liquor stores.

The commission announced Canadian-made gin would be reduced 35 cents per 26-ounce bottle to \$2.50, and 40-ounce size to \$3.80, a cut of 50 cents. Small variations in prices according to quality will be set.

Purchase Land In Alberta

Two Colonies Of Huttenrutes Have Settled Near Lethbridge

Lethbridge, Alta.—Purchase of 11,000 acres of farm lands in the Chin district, near Lethbridge, at a cost of \$110,000, by the Huttenrute brethren was confirmed. Two colonies of Huttenrutes will occupy the land of which 5,500 acres are ready for crop next spring. One block was formerly owned by R. C. Harvey, Lethbridge sheep rancher. The other was sold by the Canadian Pacific Railway lands department.

Praise For Ferguson

Montreal.—Admiration for the vigor in which Hon. G. Howard Ferguson, Canadian high commissioner in London, is pressing Canada's case for a larger share of the lumber market in Great Britain was expressed by C. E. Denny, head of a large London timber firm, who arrived here in the liner Ascania.

CODES FOR LABOR TO BE DISCUSSED AT CONFERENCE

Montreal.—Governmental codes for industry in Canada patterned after the N.R.A. codes of the United States insofar as minimum wages and hours of labor are concerned will be discussed at the forthcoming conference of representatives of all the provincial governments at Toronto, the Gazette says.

"Hon. C. J. Arcand, Quebec minister of labor, will attend," the paper continues, and it may be that he will challenge the worth of governmental codes fixing minimum wages and hours of labor for male workers as against that of juridical extension of collective labor agreements, as existing at present in this province.

"In other words, it may be held that so far as the fixing of labor conditions for men, it is better that employers and employees be permitted to come to an agreement among themselves, and juridically extend such agreements, than have governmental interference."

"This procedure, the Gazette states, was held by Quebec authorities to be a better solution of present-day labor problems than that of governmental interference."

King George Sends Approval

Praises Work In Canada In Spreading Ideals Of League

Ottawa.—Warm approval by the King of the second national study project of the League of Nations Society in Canada was expressed in a cablegram received from His Majesty by Hon. Ernest LaPointe, president of the society.

"I have learned with pleasure and approval of the work of the League of Nations Society in Canada in spreading a knowledge of the ideals and work of the League of Nations," said His Majesty. "It is vitally necessary for the promotion of peace and co-operation between peoples that public opinion in all countries should thoroughly understand and appreciate the activities of the league in the task of maintaining, through collective international action, peace and good order in the world. The peoples of the British Empire have borne and will continue to bear a heavy share of this work and I wish every success to the League of Nations Society in Canada in the execution of their plans for the coming winter."

Wins Provincial Honors

Edmonton.—Junior calf club teams from Lacombe and Olds won provincial honors in stock judging competitions here and will get free trips to the Royal Winter Fair at Toronto where they will represent Alberta in the Dominion finals. Wylie Thomson and Walter Dumbley of Olds won the Junior Dairy Calf Club section. Henry Magilton and Edward Chessor of Lacombe were victors in the Beef Calf Club finals.

Remembrance Day

Ottawa.—The "great silence" between 11 a.m. and 11:02 a.m. on November 11 will be observed in Canada, and the government has issued instructions to provincial and municipal authorities to arrange for suspension of all vehicular traffic during these two minutes. Railway and water transport will not be suspended.

Plan To Tattoo Soldiers

Washington.—Every United States soldier would be tattooed, under a plan now before the war department. As a means of identifying dead and wounded, tattooing is advocated by Lieutenant C. L. Whittle of Fort Ontario, N.Y., in The Infantry Journal, official publication of the Infantry Association.

Defends Beauty Operations

Chicago.—A defense of the use of the surgeon's knife for the sake of beauty alone when the psychological benefit to be derived by the patient is great, was voiced by Sir Harold Gillie, noted London surgeon. He pleaded for recognition of "esthetic surgery" and referred to "plastic surgery" as "the Cinderella of surgery."

Beating Up Surveyors.
Our local solicitor Mr Geo. J. Bryan spent all day on Saturday at Evansburg acting for the Complainants in 4 charges arising out of the attempt of the Jones family of Fallis to prevent a land surveyor from crossing their land.

Mrs Matilda Jones and her son Albert J. Jones were convicted of obstructing the surveyor Mr B. F. Mitchell, of Edmonton; and were also sent up for trial to the Superior Court on charges of doing grievous bodily harm to his assistant Percy Brian, who was knocked unconscious in the fracas.

The case was heard before Messrs T. B. Thompson and T. P. Bell, Justices of the Peace. C. F. Newell, K.C., of Edmonton, appeared for the defendants.

Obituary.
Philip Baron, of the Spruce Grove district, passed away at his late residence on Sunday, Oct. 28, aged 88 years. Deceased had been a resident of the district for over 40 years, having settled there in the year 1891. His wife predeceased him in 1926.

He is survived by 4 sons—Jacob, Henry, Philip, John; 8 daughters—Mrs S. Zehner, of Leader, Sask.; Mrs William Shaw, Great Falls, Montana; Mrs F. Pempert, of City, Reed, Mich.; Mrs Ph. Eichenlaub, of Edmonton; Mrs R. Swift, of Vernon, B.C.; Mrs Jac. Schultz and Mrs E. Steffler, both of Spruce Grove.

Pete's Appeal Dismissed.
The Pete Tatchen liquor case, where Pete was fined \$300 under the "possession" clause of the Government Liquor Control Act, by Magistrate McCulla a short time ago, was appealed. Monday morning the appeal was heard in the District Court, in Edmonton, when the appeal was dismissed.

Skeet Shooting 6. THE GAME

THIS is a large subject for a short article, but if the whole series is carefully read and collected, you should have no difficulty in getting hold of the essentials of Skeet shooting. Moreover, there is a great deal of information available on the subject.

Let us imagine that you have done a little shooting before, and that you are just approaching your Skeet field for your first try at the game. You are walking towards Station No. 1 with your favorite gun and a bag of twenty-five shells loaded with

Here is a little summary to remember if you can. Outdoors, from the high trap at Stations 1, 2, 3 and sometimes 4 are often overshot. Aim low, perhaps 12 inches below. Most amateurs miss because they shoot high and behind the targets. They do not swing enough or else stop swinging too quickly. If this appears to be your trouble, try to shoot too high and too far ahead and you may hit it just right. Work fast, and don't get discouraged or nervous. And so you start at No. 1 Station

number 9 chilled. The first thing to do, of course, is to cultivate a good position. You must stand at the Station in "an informal field position"—which you will understand more clearly when you have read the next article. Cultivate an easy, alert position, with your feet not too far apart so that your body is free to swing in either direction with your gun. Don't forget, you must swing on Skeet birds. There is only one correct way to aim on a moving target and that is to swing with it in its line of flight, fire when you have swung past far enough to provide the proper lead and keep right on swinging as you pull.

This is No. 6 of a series of 12 articles on Skeet Shooting. Cut it out. When all have been clipped, you will have a complete write-up of this sportsman's sport, which is rapidly becoming the vogue across Canada.

and at your call of "Mark!" or "Ready," a target is thrown first from the high trap, and then from the low trap. Thus you continue around the Stations in rotation, shooting at two targets from each position, and your first Skeet day is ended.

If you are a good bird shot, you will probably have bagged 50% of the clay birds. Eighteen to twenty is a good average, but whatever your first score, don't allow yourself to become either over-confident or discouraged. Should you wish for more detailed information on this article, or on any of the others in this series, "Dominion Marksmen," Box 1260, Montreal, will be glad to answer your questions.

THE NEWS OF STONY PLAIN AND DISTRICT.

The local Juvenile hockey players are off to a good start, financially, thru the generous response given by the town's merchants and others, when the club's committee made their appeal.

Auctioneer Zucht made 2 very successful sales this week—one on Monday for Polip Trautman; and on Tuesday for Dairyman Viladisen. On Tuesday next, the 6th, Mrs D. Steffler will be holding her clearance sale in the H. athen-down district.

Butcher Bjork announces the arrival tomorrow of a large consignment of fresh Pacific coast fish.

Mr L. G. Stevens left yesterday for the big game country; while Harry Sjaub left shortly after, at the head of another party. A number of other hunting parties will be leaving here in the course of a few days.

BUTTER AND EGGS WANTED at The Royal Cafe.

C. N. Train Service.

The train No. 190 leaves Jasper for Edmonton at 10 a.m. Sundays, Wed., Friday; arrive Stony Plain 8:09 p.m.

Train No. 189 leaves Edmonton 9:30 p.m. Sun., Tues., Thurs., and arrive Stony Plain 10:37 p.m.

LESS THAN
1¢ WORTH IN
A CAKE

MAGIC

JUST THINK—it takes less than 1¢ worth of Magic Baking Powder to make a delicious three-layer cake! And Magic is always dependable—gives the same perfect results—every time. No wonder Canada's leading cookery experts say it doesn't pay to take chances with inferior baking powder. Bake with Magic and be sure!

MADE IN CANADA

"CONTAINS NO ALUM." This statement on every tin is your guarantee that Magic Baking Powder is free from alum or any harmful ingredient.

THE TENDERFOOT

By

GEORGE R. BODNEY

Author of "The Coronado Trail," "The Canyon Trail," Etc.

SYNOPSIS

"You've fallen heir to a half-share in plenty of trouble," the lawyer told Gerad Keene. "The Broken Spur has been systematically broken ranch, and old Joe Carr, your partner, is drinking himself into ruin."

But Keene decided to go—himself—not as Gerald Keene, half owner of the Hour-Glass Ranch, but as Joe Carr, tenderfoot in a Montgomery Ward wilderness outfit.

Dad Kane, desert rat and luckless prospector till now, returning to tell Dustin and Spike Goddard, owners of the Broken Spur ranch, who had tricked him, of his discovery of a rich gold mine, and shows samples of it. He sees Broken Spur men rustling Hour-glass cattle and protests against it.

Joe Carr's daughter, Edith, repulses Dustin when he wished to make her acquaintance, saying when she walked with a man, it would not be with a squaw man. He plans revenge, but has had no opportunity so far. Affairs on the ranch going from bad to worse, Joe Carr takes to drink.

(Now Go On With The Story)

CHAPTER IV.—Continued

Spike gaped at him. Then very slowly realization came. His eyes gleamed and his red face got redder and his wire-stiff beard seemed to bristle like the mane of an angry horse.

"You know how those damned old fools of prospectors talk. They matters worse old Kane can square himself with Joe Carr by lettin' him in on what he found on the Hour-glass land. See now?"

never see any one to talk to in six months. When they get a chance the dam gives way and there's a flood. If old Dad Kane goes in to Scoo he'll tell him his gold-fund just as sure as God made it! I'll be there. He can't help it. The matter of Gray and Corne is bound to come out. . . ."

Still Spike stared at him. The full import of what Dustin said had not yet sunk in.

"They'll hardly dare tell what they done," he growled. "I'll mean jail for them, too."

"They'll turn State's evidence and

get exemption. That's the way Burke, the Prosecution Attorney, wins his cases. You poor fool! Can't you see? You'll look good in a striped suit. . . . If it gets that far."

"What do you mean by that? If it gets that far?"

"Huh. That's easy. We're none too popular in the Valley. There's a Dry Farmer in thirty miles that don't want our holdin's. If we win that suit over Soda Springs I'll throw 'em on public lands. They'll be open to all the Dry Farmers. They can water their sheep there, too. That'll ruin 'em for cattle. Even you know that."

Spike nodded at that truth; the real reason for the constant feud between sheep and cattle-men.

"It will make no difference to you an' me," said Dustin hotly. "We'll be tucked away where nobody can hurt us. . . . I tell you. . . . We're in a hell of a mess. Old Dad Kane know now just what our men have been doing. Those men will swear, to clear themselves, that they were only carryin' out orders from us. I'll all come out. . . . To make

—Spike Goddard licked his lips in silence and stared at his partner with a feral glare that promised ill to his enemy. He was not a particularly strong man but like most men of his kind, when driven to bay he could fight desperately.

"Well," he croaked, "what's the answer?"

"That's easy. . . . Dustin drew a breath of relief. To plan as he had planned in the last ten minutes was one thing. But man planning devilment needs help. He knew now that he could count on Spike as never before. Dustin went on:

"You and me, Spike, have made too much of the Hour-glass to let it ever get into court. Even old Kane with all his drunken suspicions, don't know what we've milked him for. Thank the Lord we've been too careful to show the source of our income but. . . . We've got a nice wind of cash right now in the office safe. Too dangerous to put it in the Scoo bank. I figured we might need it for a get-away if some one spills the beans. . . . Like old Dad Kane. He can do it any minute he chooses to open his mouth and talk. The matter boils down to this. . . . Old Dad Kane has come in here with the finest ore we've ever seen. It

was found on the Hour-glass lands and old man Carr doesn't know of it. While he was lookin' for that ore, old Kane found some of our men at work and can send us in jail for what he saw 'em doin'. Get me? You know what's got to be done. I needn't name it. What's the answer?"

Spike Goddard knew that answer but like his partner he dared not put it in speech. Dustin finally dared it. "Old Kane has got to show us where he found the stuff and then he's got to disappear," he said.

For a long moment silence fell; a silence in which a cricket in the wall chirped loudly and the ticking of the cheap clock on the table sounded like the crack of doom. Spike poured himself another drink. He needed it badly. He knew what was meant.

"How?" he asked hoarsely. "The less you know personally about it the better for us both," said Dustin. "It's a one-man job and I trust no other man where my own life is at stake. All I say is that I'm not going to let please old man Kane or Carr either. Suit you?"

"It sure does. . . . Spike had sudden visions of himself in a striped suit and he did not admire it. "I'll help you. . . ."

"Help me hell," said Dustin fiercely. "I tell you it's a one-man job. One-and-a-half that is. First I'm goin' in to Scoo on business. Be sure you keep old Dad Kane here. Don't let him leave on any excuse. Tell him I've gone to make arrangements for you to go back to open the mine. Keep him here till I can back. I want him out all I get about old man Kane's finances."

"Huh. From all I hear he ain't got any. How'll you find out?"

"I've got ways you never thought of. . . . Dustin grinned as a coyote grins at sight of game. "The really big thing for us just now is to make Kane show us exactly where his location is. It'd be right bright to have him disappear and then find out we don't know where he found the gold."

He poured himself another drink and picked up his hat. "I'll be on my way," he said. "Be sure you ride out of town."

Spike watched the departing car and when its following dust-cloud was swallowed up turned away to the kitchen.

He was under no illusions as to what Dustin meant when he said that Kane must disappear. During the many years of their partnership he had seen some curious things. Sometimes he thought that that very partnership was the only reason for their mutual safety. Either could hang the other by too much talk. He knew Dustin was cautious and ruthless and he knew suddenly that his "and" of old man Kane would put them both beyond any further need of more money. Dustin was right.

"He'll probably bring home the bacon," he muttered. "Even if he has to kill somebody else's hog to get it."

That was exactly what Sam Dustin proposed to do. He knew that the prospectors over Soda Springs had cost Carr more than he had. He knew that the Broken Spur depredations on the herds of the Hour-glass had put that ranch in the red. He was sure that Joe Carr must owe a lot of money and he meant to find out to whom he owed it. Dustin believed in the strong hand and he knew that Solomon was right when he said: "The borrower is servant to the lender." It was dark when he packed his car before the sheet-iron-fronted saloon in Scoo. He strode down the main street, turned off at a dark alley and stopped at a little frame bungalow set well back in a clump of dusty Chinaberry trees. The door flew open at his knock and, almost instantly, an old woman holding a stinking kerosene lamp above her head, stood facing him.

"Evenin', Miss Peters," he said civilly enough, "Sim in?"

"He went for the mail," said Mrs. Peters. "He ought to be back in a minute. Come in, Miss! Dustin. There comes Sim now," she added. (To Be Continued)

Something To Know

If you want to revive wilted lettuce or other salad greens, put them in a pan of ice water to which has been added a cupful of vinegar. Let them rest for half an hour and they'll be quite crisp. Incidentally, if you press lettuce in a damp towel and stick the ends of the towel in a dish of water, it will keep fresh for days.

Free Samples at Druggists of the Remarkable New Aid in the Prevention of Colds

Local Druggists Are Now Offering A Free Trial Of Vicks Vapo-nol For Nose and Throat—Also Of Its Ideal Companion, Vicks VapoRub

NEW PREVENTION IDEA

This Discovery Introduces Unique Vicks Plan For Better Colds-Control

HOW VICKS PLAN WORKS

Following years of research on the problem of colds, Vicks Chemists have developed a new aid in preventing colds—Vicks Vapo-nol, for nose and throat. This new Vicks preparation is the ideal companion to Vicks VapoRub, the modern method of treating colds.

These two Vicks preparations, together with a few simple rules of health, form the unique Vicks Plan for Better Control of Colds. The helpfulness of the Plan in reducing the number and duration of colds has been clinically tested by physicians. (Full details of the Plan are in each package of Vicks Vapo-nol and of Vicks VapoRub.)

Briefly, here is how Vicks Plan works:

To Help Prevent Colds
Watch yourself and children after exposure to any condition that you know is apt to be followed by a cold, such as:

Contact with others having fresh colds—croup, stuffy ill-ventilated rooms, public places—sudden changes in temperature—excesses in living, such as over-eating, smoking or drinking, which reduce body resistance.

To Help Prevent Colds
Wherefore beloved be diligent that ye may be found of Him in peace, without spot, and blameless." 2 Peter 3:14.

His conscience knows no secret things. While grace and joy combine To form a life whose holy springs Are hidden and divine. —Isaac Watts.

Even the smallest discontent of conscience may render turbid the whole temper of the mind; but only produce the effort that restores its peace, and over the whole atmosphere a breath of unexpected purity is spread, doubt and irritability pass as clouds away, the withered sympathies of earth and home open their leaves and live, and through the clearest blue the deep is seen of the heaven where God resides.—J. Martineau.

The state of mind that is described as meekness, or quietness of spirit, is characterized in a high degree by inward harmony. There is not as formerly that inward jarring of thought contending with thought, and conscience asserting rights which it could not maintain.

Jumpy Nerves

Yield to the soothing action of this medicine. You will ease better . . . sleep better . . . feel better . . . look better . . . Life will seem worth living again. Don't delay any longer. Begin taking today.

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

Alaix (to garage man). "Henry Gearshift tried to make me believe he'd driven the same car for five years and never paid a cent for repairs. Do you believe that?" Garage man—"Yes; I'm the fellow who's made all the repairs."

Change of Climate, Diet, Water Often the Cause of Diarrhoea

If you are suddenly attacked with Diarrhoea, Dysentery, Colic, Cramps, Pains in the Stomach, Summer Complaint or any Looseness of the Bowels, do not waste valuable time, but get a bottle of Dr. Fowler's Extract of Wild Strawberry and see how quickly it will relieve you.

This bowel complaint remedy has been on the market for the past 38 years and you are not experimenting with some new and untried medicine.

Do not accept a substitute. Get "Dr. Fowler's" when you ask for it, and be on the safe side. Put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Then—at the slightest irritation in the nasal passages, where most colds start—use Vicks Vapo-nol at once. Just a few drops up each nostril. Repeat every hour or so, if needed. Vapo-nol aids Nature's functions—in the nose—to prevent colds, and to throw off colds in their early stages. Used in time, Vapo-nol aids in preventing many colds.

To Help Shorten a Cold

If a cold has developed, rub Vicks VapoRub well over throat and chest at bedtime. Through the night, VapoRub attacks the cold direct—two ways at once—by stimulation, direct through the skin, like a poultice or plaster—and by inhalation of its medicated vapors direct to the inflamed air-passages. This long-continued double action loosens phlegm, soothes irritated membranes, eases difficult breathing, and helps break congestion.

During the day—any time, any place—use Vicks Vapo-nol every few hours as needed. This gives you full 24-hour treatment without the risks of constant internal dosing, which so often upsets the digestion—especially of children.

Trial Packages Free

Your druggist has free combination packages containing trial sizes of Vapo-nol and VapoRub—also folder telling how these twin aids to fewer colds and shorter colds are used in Vicks Plan for Better Control of Colds. Write for them to your druggist's plan is limited.

More Cars in British Columbia

Number Increased By Over 2,000 In Last Year

An increase of more than 2,000 automobiles in the last year in British Columbia is shown in a report completed by Inspector G. A. Hood, of the motor accident office. At the end of September there were 70,919 passenger vehicles operating and 15,642 piled in the commercial trade. Last year at the same time there were only 69,373 passenger cars on the road and 15,051 commercial cars. This represents a combined increase of 2,136.

INFANTS' COLDS Relieved!

Young children easily catch cold. When a mother gives her child a bottle of Baby's Own Tablets, she gives him the best of all medicines. Thousands of mothers do the same not only for colds but for fretfulness, irritability, constipation, teething troubles, colic, upset stomach, and all the ills of infancy. Tablets are safe and sure in relieving children's common ailments. Price 25c.

BABY'S OWN TABLETS

New Industry

Plant For Production Of Sodium Sulphate May Come To Saskatchewan

Establishment of a new industry in Saskatchewan, believed to be for the production of sodium sulphate, is being contemplated by a firm of manufacturing chemists with head office in New Jersey, and branch offices in Montreal and Toronto.

Government officials received information concerning the plant and coal costs, and other particulars.

The location of the plant, according to the letter, would be in southern Saskatchewan, near the United States border, some 12 miles from the nearest railway.

The Full Value of Cod Liver Oil

Scott's Emulsion gives you greater recuperative powers because it is an easily and quickly digestible form of Cod Liver Oil in a solution of bone building hypophosphites of lime and cod-liver oil—PLUS value you get in Scott's Emulsion of Cod Liver Oil.

SCOTT'S EMULSION

THE COD LIVER OIL WITH THE PLUS VALUE

For Sale by Your Druggist

THE hunting season is here. In Canada the wine of early fronts is in the air and the maples, like banners of crimson and gold against the dark friendly evergreens, proclaim that once again the "red gods" hold high carnival. The woods are at their best—the moose is sleek and black, the buck deer has his horns burnished to his fancy, the coat of the black bear shines like silk and the lustrous robe of the grizzly is a study in

dark and grey. The big-horn sheep is restless and alert, the mountain goat snow white and the caribou in the prime. The grouse and woodcock are plump and contented in the covers, while the ducks and geese are gathering in favourite feeding grounds in preparation for their long flight south. The game areas of Canada, scattered from ocean to ocean, are readily accessible from any part of the continent. It is not a country for the wealthy sportsman only; the hunter with moderate means

may also be suited. Local residents can enjoy a trip at a very reasonable cost. Sportsmen from other lands are welcome and are only asked to show their appreciation of the privilege of access to her game fields by obeying the hunting laws and observing the ethics of sportsmanship. A publication entitled "Canada's Game Fields" which should be of interest to sportsmen planning a hunting trip in Canada may now be had upon application to the National Parks of Canada, Department of the Interior, Ottawa.

Sunday's Concert.

The concert given here on Sunday by the Edmonton combined Lutheran choir was greatly appreciated by the large crowd which attended. A Schaufpiel in 4 acts was also presented, depicting the sufferings which Christians in Russland encounter at the present time; the character parts in this playlet being well taken.

The Ski Club.

A meeting was held in the town hall on Monday to organise a Ski club, when these officers were elected—

Pres., C G Singer
V-Pres., E Collicutt
Sec., A Larson
Treas., S Comisarow

The joining fee was fixed at 50c. It is the intention to put on dances, card parties, and, possibly, plays.

The name of the club is registered as Skoo Ski club.

Ed Dannhauer is convener of the entertainment committee, with the Misses B and E Wudel and H Trapp as members.

Another meeting is to be held Wed. next, Nov. 7th, in town hall at 8 p.m. sharp.

Free Ad. in the Dailies.

Edmonton dailies devoted some space in their columns on Friday to the motoring activities of Mr E H Baron, the automobile dealer. The publicity was due to the tale told by Constable Johns, of the Highway Patrol, to Col. P C H Primrose, presiding magistrate at Edmonton police court.

If the sentence imposed by the Magistrate is enforced it will mean a serious handicap to a business man already under a heavy handicap, and toward whom his many friends here feel sympathetic.

Holborn Happenings.

Tee Hallowe'en dance put on by UFWA was a huge success; people from all over the country attended. Fortune telling was the big attraction of the evening.

Mr A P Anderson has procured a hammer mill, and, "oh baby! does it do swell work!"

Mr Everington returned home Sunday from spending a few days with relatives in Edmonton.

The report came Sunday that there was a lot of ice on the river; in fact it was strong enough to hold up a man a short distance from shore. It won't be long now, boys, till we can play hockey!—H. J. R.

A Good Market for Wheat.

Conservative estimates by Winnipeg grain experts are to the effect that Canada will dispose of about 25,000,000 bu. of wheat of all kinds to the U.S. this crop year. The importance of this is, that it is a new market for grain that would otherwise remain here. Figures on the export trade in Canadian grains to the U.S. show that a total of 2,754,532 bu. of Canadian wheat valued at \$2,829,994 entered the U.S. during Sept., paying a duty of 42c. a bu. This was for human consumption. There is good reason to believe much Canadian wheat will go into U.S. bread this winter.

Hallowe'en Masquerade Dance, Kelly's Hall, Friday, November 2nd.

On the Side.

Edmonton has a pretty nifty bunch of "dicks." An auto was parked on a street for a period of nearly a month, with the owner an hospital a few blocks away, and it took the sleuths only three weeks to find this out.

—Contrary to rules laid down in the text book on "Composition," when the Judge says "License suspended for life!" this is where a sentence seems longer than a paragraph.

—If the reader needed to have his attention drawn to more signs that it's going to be a record hard winter, there's the yarn about the elephant at Chicago's Zoo. Every winter to date they've had a heck of a time getting the pachyderm into her steam heated winter quarters, but this fall she went in without any coaxing.

—The Quebec Government does some good deeds, occasionally. It has decided to aid all weekly newspapers in that province by a substantial subsidy, regardless of a paper's political stripes.

—Not to be outdone by Carmichael's pig with a spare leg, along come a chicken with four legs, strutting around Mrs Collins' yard down in Kentucky. She (the chicken) has the "spares" right behind the regular pair, but don't use 'em unless she has trouble with the others.

—Down in Calgary the other evening a bandit tried to hold up a chemist's shop but didn't succeed, the chemist disarming him, and selling the poor bandit two toothbrushes for 26c. before he let him escape.

—Here's a just-out charade; try it:

Steffler Sale Tuesday Next.

Oh Tuesday next, November 6, Auctioneer Zucht intends holding an auction for Mrs Steffler, in the Heatherdown district. This is to positively be a clearance sale, with no reserve on anything, as the owner is giving up farming. Horses, cattle, and a big lot of farming machinery are on the bills. Sale starts 12 Noon.

The UFA Convention.

The Convention of UFA and UFWA Locals of the Stony Plain Provincial Constituency was held at Magnolia on Saturday last, the 27th October. There was a good attendance of delegates and visitors present, considering that the busy time for most farmers is still on.

The speakers were: Hon. J. Russell Love; Mr Elmer Roper, of Edmonton; Mrs Price, President of the UFWA organisation; and Donald MacLeod, M.L.A. for Stony Plain.

Several automobiles, loaded with delegates and visitors, left here early Saturday morning for the 40-mile trip.

This Thursday Evening.

Mr Goodman has for our edification at the movie picture house on Thurs. the 1st, the Three star film "Hell Below," with Robert Montgomery in the leading part. With him will be seen Walter Huston, Madge Evans, Jimmie Durante, Eugene Pallette, Robert Young.

Helen Hayes and Ramon Navarro were at their best in their characterisations in the delightful film "Son Daughter," shown here on Thursday night. The whole theme was off the regular line of films shown here, and seemed to give a greater pleasure to the audience due to this fact. The Travel Talks shown proved both interesting and instructive.
